SERVICES**

**SUBJECT
Adult Day Health**

DEFINITION

Adult Day Health provides a broad range of health, nutritional, recreational, social, and habilitation services in settings outside the person's place of residence. Adult Day Health services do not include residential overnight services.

PROVIDER REQUIREMENTS

Adult Day Health providers must be licensed by the Department of Public Health and Human Services.

SERVICES OFFERED BY THE ADULT DAY HEALTH CENTER

The adult day health center must provide at least one meal a day to individuals who stay at the center up to ten hours and two meals per day to individuals who stay at the center over 10 hours. The center must also have a written agreement with each individual or other person responsible for the individual that pertains to cost of care, type of care, services to be provided and the manner by which the responsible party will be notified of significant changes in the individual's condition and the need to seek emergency care for the client. To avoid duplication of services, the Case Management Team should check this agreement before approving admission to determine what the adult day health center is responsible for providing.
